

TEST - CERTIFICATION

about

ZUBORA 65 H Plus

The above mentioned preparation produced by
Fa. Zeller+Gmelin GmbH & Co KG, D-73054 Eislingen
has underwent an allergological investigation supervised by an
expert dermatologist and allergologist.

Certified by an epicutaneous patch test according to
international directions no toxic or allergic reactions were to be
read.

From these results it can be concluded that the preparation tested will
not lead to adverse skin reactions indicated by skin irritation in practical
and proper use.

No prediction can be given concerning the development of toxic skin
reactions by increasing concentration of product or development of
allergic contact reaction in mid- or long term usage of preparation.

The product can be declared as

„dermatologically tested“
