# **Technical Data Sheet**

### Zubora 10 S Plus NL

## **Product description**

- · water-miscible cooling lubricant
- · on the basis of mineral oil
- · long-term stable
- · excellent corrosion protection

As the product does not contain any secondary amines, there is no risk of formation of nitrosamines according to the current state of knowledge.

Furthermore, **Zubora 10 S Plus NL** is inhibited against formation of nitrosamines, this means that even if there are any secondary amines and nitrites (e. g. through foreign carry-over), no stable N-nitrosamines can be formed. Even when exceeding the limit value for nitrite according to TRGS 611 a partial or complete change of the emulsion is not necessary.

### **Characteristics**

Colour / DIN ISO 2049: 1.0

Density/15°C / DIN EN ISO 12185: 990 kg/m<sup>3</sup>

Viscosity/20°C / ASTM D 7042 : 200 mm<sup>2</sup>/s

pH-value (5 % in H2O) / DIN 51 369: 9.1

Cast iron chips test (1:20) / DIN 51 360/T2: Corrosion degree 0

Mineral oil content: 40 %

Water hazard class, concentrate: 2

Water hazard class, emulsion: (< 70 %) 1

Correction factor for determination of the concentration - 1.0

refractometer:

## Application

**Zubora 10 S Plus NL** is suitable for metal cutting operations involving steel, cast iron, aluminium and non-ferrous heavy metals. It can be used up to medium difficult operations. Furthermore, **Zubora 10 S Plus NL** is very well suitable for grinding.

# **Technical Data Sheet**

### Zubora 10 S Plus NL

Due to selected ingredients **Zubora 10 S Plus NL** shows in soft water very low tendency to foam as well as good corrosion protection. The recommended hardness of water is between 4 and 8° dH.

### Working concentration

Grinding approx. 3 - 5% Metal cutting approx. 5 - 7%

## **Storage**

Recommended storage temperature: +5 °C up to max. +40 °C.

### **Miscellaneous**

**Zubora** cooling lubricants and our guide and slide way oils **Divinol T 3 EP ISO 32** / **Divinol T 6 EP ISO 68** / **Divinol T 8 EP ISO 100** / **Divinol T 12 EP ISO 220** are optimally compatible with each other. The combined use shows excellent de-emulsification properties, i.e. mixtures of emulsions and slide way oils separate quickly. Black stains can be excluded to a great extent.
